>>> FOUNDATION WARRIOR - SIDVIN BURLI

In 2022, an athletic 19-year-old boy named Sidvin Burli was diagnosed with Osteosarcoma, a deadly form of cancer that originates in the bone-forming cells. The diagnosis hindered Sidvin from partaking in sports and excelling in his academics. Sidvin was disheartened and his family embarked on a difficult journey originating from the pain of diagnosis to watching their son undergo aggressive treatment. After exhausting all their financial resources to pay for treatment, Sidvin's parents were left helpless and dismayed. However, the Foundation was able to help fund his remaining treatment. The courage, the passion and determination were clear from a boy who was bed-ridden a few months ago. From plight to rejuvenation, Sidvin can once again do all that he desires, to get an education, land a good job, to help his mother and grow up to be a successful young man. He visits the HCG Hospital for follow-up treatment once every 3-4 months. Additionally, he recently had leg surgery, enabling him to walk with the help of a single hand walker. He is currently studying **1st year engineering**. HCG Foundation is immensely grateful to all who have financially assisted in Sidvin's **successful treatment**.

VALENTINE'S DAY+ CHILDHOOD CANCER DAY EVENT <<<

On Valentine's Day, The HCG Foundation organized a fun-filled immersive event for children. The Foundation set up tables in the Swasti Gallery, equipped with a fancy arts package consisting of a coloring book, crayons, paint, paintbrushes, felt markers and more. Bhagya Ajaikumar stencilled out flowers in different colors for the children to incorporate in their artwork. Shrushti, Art Therapist, took the lead in guiding the children to make creative pieces of art. The children appeared to enjoy their quiet time of creative thought, each using different mediums to prepare something to demonstrate their imaginative minds. Dr. Intezar and Dr. Amit came by to interact with their respective patients. It was a successful event with everyone taking part in bringing joy to the children.

THE MASQUERADE CHARITY BALL

The HCG Foundation's Annual Masquerade Charity Ball is a sophisticated affair, conducted to raise money for underprivileged cancer patients. Dr. Ajaikumar kicked off the evening with personal anecdotes, expounding on the background and purpose of the HCG Foundation and encouraging all those present to partake in supporting the Foundation.

The root of the Foundations' success lies in our ability to raise funds for our patients. Consequently, the Foundation team channels all their energy to one primary task- Fundraising. By zeroing in on the financial plight that many cancer patients face, we at the foundation know it is of supreme importance to ease the economic burden of a patient while addressing the physical ailment required for recovery.

Taking one small step at a time, our focus is on organizing events, such as the Masquerade Ball, to construct a pool of funds which we will use towards helping exponentially more cancer patients each month.
